PERFORMANCE NOTES:

Riddles 74, 46 & 47 are puzzle canons. The realizations are found by solving the accompanying riddle-instructions and applying the answers to the canon. Riddle 69 is not a canon itself, yet is part of a puzzle. Hmmm.

Each movement can be transposed up or down in order to facilitate performance.

Accidentals apply to the octave in which they appear and hold throughout the measure, though in highly chromatic passages courtesy accidentals are given.

The Riddle 74 canon contains many very long phrases and covers a wide range. Being that two singers share each part, breaths can be elided to provide the appearance of unbroken phrases. Likewise, a high voice and a low voice should be paired together so that the entire range is comfortably covered by at least one singer.

Relatively few phrasing or dynamic markings are given. This does not by any means signify that the piece should be performed monotonously without shape, direction, or emotional content; quite the contrary! The exact interpretation may vary from performance to performance, but many of the gestures and emotional climaxes in the piece obviously lend themselves to a certain treatment, and any interpretation of the details sung with conviction will be successful.

The solutions to the riddles should not be printed in the concert program. Rather, the performers should tell the audience the answers after the piece is over; preferably after the applause (assuming there is any!), before exiting the stage or proceeding to the next piece on the program.

Approximate duration: 8 minutes

Riddle is a setting of four riddles from *The Exeter Book* (a.k.a. *Codex Exoniensis* or *Liber Exoniensis*), a collection of Old English religious and secular poetry compiled c.970 and given to Exeter Cathedral by Bishop Leofric (d. 1072).

Though the manuscript was compiled at the end of the 10th century, the 95 riddles contained therein date from much earlier. During the 19th century many scholars believed them all to be written by a single 8th century poet, Cynewulf; this theory has since been unanimously discredited. Many authors presumably wrote them, probably over a period of at least two hundred years; some have been dated to as early as the 8th century.

The Exeter Book provides no answers to the riddles. Some of the answers are quite obvious, sometimes there are two or more "correct" answers, and in several cases the answers have been lost in obscurity and contemporary scholars cannot agree on any plausible solution at all.

Texts and Translations:

Riddle 74

Ic wæs fæmne geong, feaxbar cwene,
ond ænlic rinc on ane tid;
fleab mid fuglum ond on flode swom,
deaf under yþe dead mid fiscum,
ond on foldan stop, hæfde ferð cwicu.

I was a young maiden, a grey-haired queen,
And like a lone warrior at one time,
(I) flew with birds and swam in the sea,
(I) dived under waves dead among the fishes
and on Earth stepped, holding living spirits.

Riddle 69

Wundor wearð on wege; wæter wearð to bane.

A wonder on the wave / water became bone.

Riddle 47

Moððe word frat. Me þæt þuhte
wratlicu wyrd, þa ic þæt wundor gefrægn,
þæt se wyrm forswæalg wera gied sumes,
þeof in þystro, þrymfæstne cwide
ond þæs strangan stapol. Stælgieost ne wæs
wihste þy gleawra, þe he þam wordum swealg.

Mote ate words. It seemed to me
a curious event, when I heard of that wonder,
that the worm swallowed a man's song,
a thief in darkness stole the fine saying
and its foundation. The thievish guest was
not one whit the wiser for swallowing words.

Riddle 46

Wer sæt at wine mid his wifum twam
ond his twegen suno ond his twa dohtor,
swage gesweostor, ond hyra suno twegen,
freolico frumbearn; fæder wæs þær inne
þara æþelinga æghwæðres mid,
eam ond nefa. Ealra wæron fife
eorla ond idesa insittendra.

A man sat at wine with his two wives
and his two sons and his two daughters,
beloved sisters, and their two sons,
beautiful first-borns; father was there within
together amidst both the princes,
uncle and nephew. They totaled five
noblemen & women, all those sitting within.

Bassus  *p* x 3

Moð - ðe word fræt. Me þæt þuh - te...

rit. -----

Canon II (Tenor II): As a worm crawls, you crawl tailfirst; but you ate your head! (Being headless makes you just a tad lighter, though.)
And as a moth swallows words, you swallow all but the tail.

Repeat as many times as there are people in the room.
(The same goes for the other singers, too.)

All: Remember winter, precisely as it was, one by one.

Altus: No wine for you!

Tenor I: Your winter memories cause you to forget the beloved sisters & their sons, and to droop 2 1/2 inches.

Tenor II: You're always drooping that much.

Bassus: Face it; you're slow. Half as fast, in fact. You can't even remember anything after the two daughters.
But hey...at least you're 2 inches taller than Tenor I.
